Subject: Release for images in SETAC document

Joe,

Hello, I hope this note finds you well.

It has been a while, but Dave and I are trying to get the SETAC document to print. We have received and have nearly completed incorporating all external comments on the document, and soon it will go back to SETAC and the publishers to being copy editing.

One of the things we need to do, is to acquire releases for the images that will be printed in the book. We don't have too many, and there is one credited to BASF, so I thought you may be the source. If you aren't, do you happen to know who is? (I have attached a file with the subject image for your reference).

If you are the source, and you are ok with allowing SETAC to use this image in the book, we will need you to send a note to this end. Below is text that should satisfy Wiley and SETAC for this purpose (you will need to specify how you want the credit to be titled ... for example Mace will specify that his photos are credited to

“Mace Vaughan, *Xerces Society for Invertebrate Conservation*”).

Please send this to: Larry, Jenn and Mimi, cc Dave and me

Thanks Joe, call me if you have any questions, talk w. you soon,
tm

Ex. 6 Personal Privacy (PP)

XXXXXXXXXX

XXXXXXXXXX

Regarding certain photographic images for use in the manuscript that is being prepared to be published by SETAC Press and John Wiley & Sons, Inc., for the book entitled:

Pesticide Risk Assessment for Pollinators: Summary of a SETAC Pellston Workshop

I [*Joseph Wisk*] grant the Society of Environmental Toxicology and Chemistry (SETAC) permission to include the material indicated below only in the book referenced above, including all media expressions now known or later developed directly connection with the above referenced book, including in all foreign language translations, and subsequent editions of the above referenced book. Appropriate credit must be given as provided below.

I warrant that I am the sole owner of the rights granted and that the material specified below does not infringe upon the copyright or other rights of anyone.

Chapter 7, image #7-4: Honey bee semi-field study with *Phacelia*, photograph provided by [*BASF SE*]
